

# YVES DE VOS

## MALE PELVIC HEALTH SPECIALIST PRACTITIONER

With over 30 years physiotherapy experience, Yves has successfully treated thousands of musculoskeletal and men's health clients. He is an educator in the use of shockwave therapy in the UK and abroad and author.

*Shock Wave treatment, does it work—YES it did for me ... Yves has changed my life and that of my wife's, thank you Yves. **GT***

*I am delighted to report that my experience with Yves De Vos can be highly recommended. **RG***

## ABOUT THE CLINICS

We see a lot of male pelvic health patients in our clinics. We provide assessments, advice and treatment to treat a wide variety of male pelvic health conditions.

## PROVEN & SAFE SYSTEM

- ① **SAFE**  
All treatments have great safety records and the equipment used is CE marked and approved to use for urological and musculoskeletal conditions.
- ② **PROVEN**  
All treatments and protocols are research based and the assessment allows us to ascertain the best possible protocol for your specific condition.
- ③ **DISCRETE**  
We at all times have strict patient confidentiality and ensure complete discretion. You will be offered a chaperone as part of our service.

## WE CAN HELP YOU

We combine musculoskeletal physiotherapy skills with focused shockwave therapy and Extracorporeal Magneto Transduction Therapy (EMTT) to achieve the best results.

- ① **ERECTILE DYSFUNCTION**  
We use focused shockwave to improve blood flow in the penis.
- ② **PEYRONIE'S DISEASE**  
The size of the scar tissue (plaques) associated with Peyronie's Disease can be reduced by using focused shockwave.
- ③ **POST-PROSTATECTOMY REHABILITATION**  
Incontinence and erectile problems can be successfully resolved using our proven systematic approach.
- ④ **CHRONIC PELVIC PAIN SYNDROME**  
CPPS, also known as Prostatitis, can be treated with a combination of MSK physiotherapy and focused shockwave therapy.
